EXPERIENCE

Onyi Limited - Ghana (POS, Ecommerce) | Mobile Engineer
(Flutter) (Contract)

<https://play.google.com/store/apps/details?id=com.nos.onyiltd.app>

I built mobile application for the company which has the following features :

Point of Sales/Merchant feature : This is the part of the app where merchant/sellers can upload their products, manage sales, check inventory, online order management, expenses tracker, e-wallet and lot more. Sales can be done both offline and online.

Ecommerce feature : This is where the products uploaded by the merchant can be visible to the buyers, it has all features of an ecommerce platform like, CART, PAYMENT, ORDERS etc

I used the BLOC design pattern with the SOLID principle to build a readable, well-architected, testable application.

TOP PAST PROJECTS

INVENTORY MANAGEMENT SYSTEM (POS)

2017 | PHP, JAVASCRIPT, SQL, HTML, CSS

- Built an Inventory Management Systems Used by most Supermarkets around me.
- The project was built using PHP and JavaScript with HTML, CSS and SQL, and was Converted to a Desktop Application Using PHP Desktop Chrome so it can be accessible without browser and MYSQL Community as Offline Database.

JAMB CBT PRACTISE SOFTWARE

2017 |

- Built a Joint CBT Practice software (Desktop Application) with over 10,000 Past Questions and it's used by Jambites, Tutorial Centers, CBT Centers etc. for Practicing.
- The Software has huge sales because it has almost the same Interface as JAMB real Examination Interface, built this base on my familiarity with JAMB and while I was waiting for admission.
- The Software does not use any database for data storage, all questions are written in JSON and import as a script to the Page. 90% of the Application is in JavaScript

EXAMINATION MANAGEMENT SYSTEM

2018

- Built the examination management system for a Higher Institution in Nigeria, used for writing exams by student and POST UTME exams
The Software was installed on the school server and used by 300+ systems at a time without lagging.

EVOTING PLATFORM

2020

- Built an E voting platform for a Higher Institution in Nigeria, for voting by the Students during the **LOCKDOWN**, this app was used by over 10,000 students for the election with slight complain by the students over Token Generation and this was due to their Phone Number being on **D.N.D**

PAYMENT PLATFORM
