PROJECTS

E-COMMERCE APP

MULTI-VENDOR E-COMMERCE APP (NOS)

LARAVEL, Flutter, and React JS.

May 2022 - August 2022

This project is being built with LARAVEL, Flutter, and React JS. I am working as the back-end developer on this project.

The major purpose of the software is to help business owners get access to create a store, and manage their sales online and offline.

The App is available on test flight for both android and IOS users until it is fully live for people to access.

FINANCIAL SERVICES

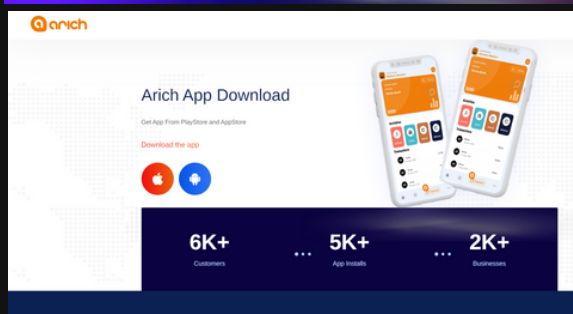

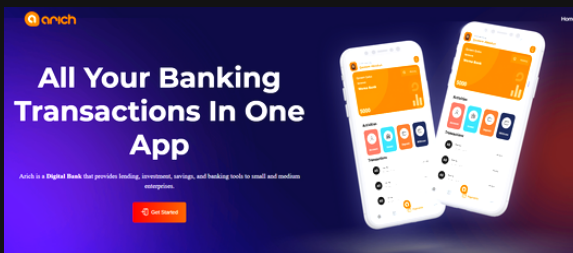

FINANCIAL SERVICES PLATFORM (ARICH)

LARAVEL, FLUTTER FOR MOBILE UI DEVELOPMENT

November 2021 - present

I Co-created this application with other developers as the back-end developer. With the app, one can make deposits using a virtual account, also, one can invest their money, save their money for a particular term, withdraw, transfer money as well as a loan feature.

This project was built with LARAVEL as the back-end framework and Flutter for the mobile UI development.

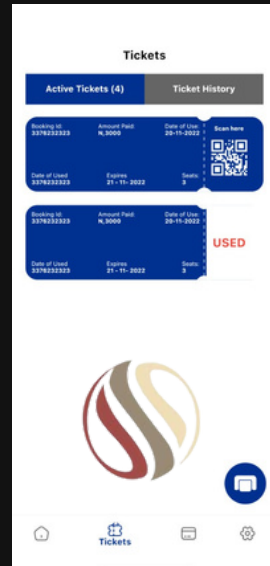

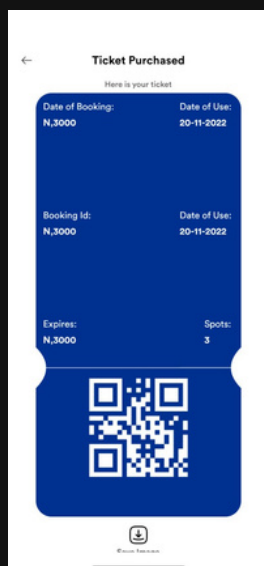

CANASPORTS (SMS)

SPORTS MANAGEMENT SYSTEM (CANASPORTS)

SPORTS MANAGEMENT SYSTEM

2021 (February - May)

CANASPORTS was modeled after the popular stadium, MARACANA. An entrepreneur developed an idea to build a stadium as huge as MARACANA and I was contracted to develop the software that manages all activities on the stadium. The mobile applications were previously on a test flight and can be made available on request.

PROJECTS

E-LEARNING WEB APP

LEARNING MANAGEMENT SYSTEM

PHP/LARAVEL and REACT JS.

2021 - Yet to be launched

Built an e-learning platform that enables students to register for courses, watch online and live videos of the classes, take quizzes, etc.

This project was built using PHP/LARAVEL and REACTJS, it can be accessed via any online browser.

FINANCIAL SERVICES

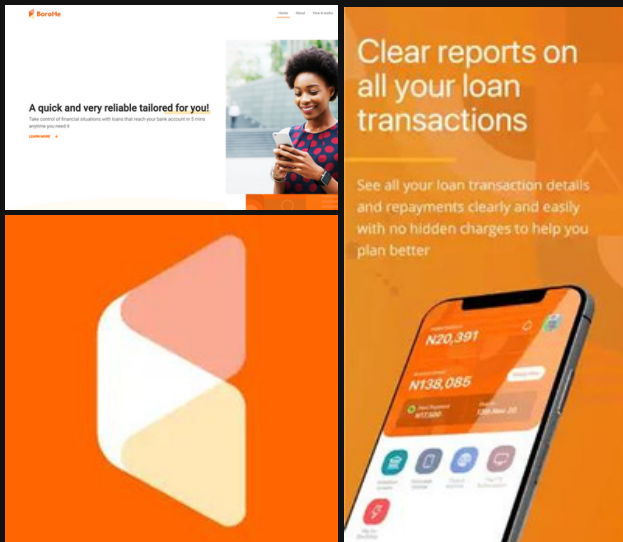

FINANCIAL SERVICES COMPANY (BOROME)

LARAVEL, FLUTTER FOR MOBILE, and ANGULAR.

2019 - present

A financial service company that gives loans to users and renders other services like payment of bills, transfer money service, etc. I worked as the back-end developer on this project.

This project was built with LARAVEL as the back-end framework and flutter for the mobile application development, with a well-structured admin panel built with angular.

PORTFOLIO WEB APP

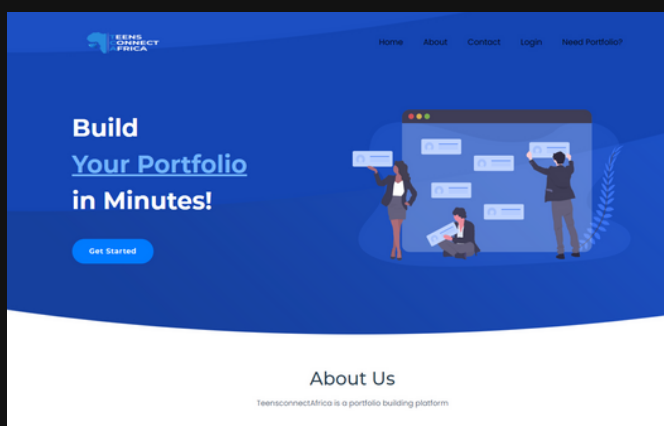

A PORTFOLIO-BUILDING WEB APPLICATION

PYTHON, JAVASCRIPT, DJANGO, SQL, HTML, CSS

2019

This software gives people the opportunity to create their personal portfolios in an easy way, showing information about one's professional experience and the work or projects they have done. Their links can be placed in the link bio which is usually left empty by users of social media. You can also upload your resume, projects, awards, and educational information, etc.

The project was built with DJANGO, JavaScript, HTML, CSS, and POSTGRES SQL, so it can be accessible with a valid online browser.

ONIALS

SOFTWARE ENGINEER

Ikeoluwa is a detailed and very dynamic software developer. His attention to detail and resilience is very admirable. And, I like that he is very versatile as a software developer.

Knowing him and having worked with him is a delight in many ways.

ENTREPRENEUR

Ikeoluwa Favour has helped bring to life an idea previously thought difficult. His work on designing and developing digital applications for service delivery has brought ease in delivering great service to the target customer.

He is also pretty calculated and composed. I would recommend his expertise for projects requiring it, any day any time.

PRODUCT MANAGER

The dream of every product manager is to have a team of developers that understand how to deliver excellence in the execution and development of a product idea or experience, and Ikeoluwa doesn't fall short in this regard.

He is well-rounded and very pragmatic.
